DETAILED ACTION

Status of the Claims

1. Claims 50 and 53 are pending.

Applicants' amendments filed April 7, 2008 is acknowledged. Applicant's response has been fully considered. Claim 50 has been amended. Therefore, claims 50 and 53 are examined.

Withdrawn Claim Rejections - 35 USC § 112

2. The previous rejection of claims 50 and 53 under 35 U.S.C. 112, first paragraph, written description, is withdrawn in view of applicants' amendment to the claim, and applicants' response at page 3 in the amendment filed April 7, 2008.

Examiner's Amendment

An **Examiner's Amendment** to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Examiner's Amendments to the Specification:

Please replace the paragraph [01] at page 1 of the specification with the following paragraph:

This application is a continuation application of co-pending application serial number 08/261,668, filed June 17, 1994, now U. S. Patent 6,713,072, which is a continuation application of application serial number 08/012,243, filed February 1, 1993, abandoned, which is a continuation application of application serial number 07/265,742, filed November 1, 1988, abandoned, which claims priority under 35 U.S.C. § 119 to Italian application serial number 22481 A/87 filed November 2, 1987.

The following is an Examiner's Statement of Reasons for Allowance: The following reference is related to the claimed invention. *Pizza et al.* (U.S. Patent 6,713,072) disclose and claim an immunologically active modified pertussis toxin comprising the S1, S2, S3, S4 and S5 subunits of pertussis toxin having the same arrangement and configuration as that present in the natural pertussis toxin, wherein the S1 subunit is modified by the substitution of glutamic acid at position 129 with glycine and the substitution of arginine at position 9 with another natural amino acid such as glycine, and a method for immunizing a human against pertussis comprising administering an effective amount of an vaccine comprising at least one of the modified pertussis toxin. An obviousness type double patenting rejection, which was made in the instant application over the U.S. Patent 6,713,072, is withdrawn in view of a terminal disclaimer filed over the patent. Therefore, the claims are allowable over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
